THE UNIVERSITY OF SYDNEY

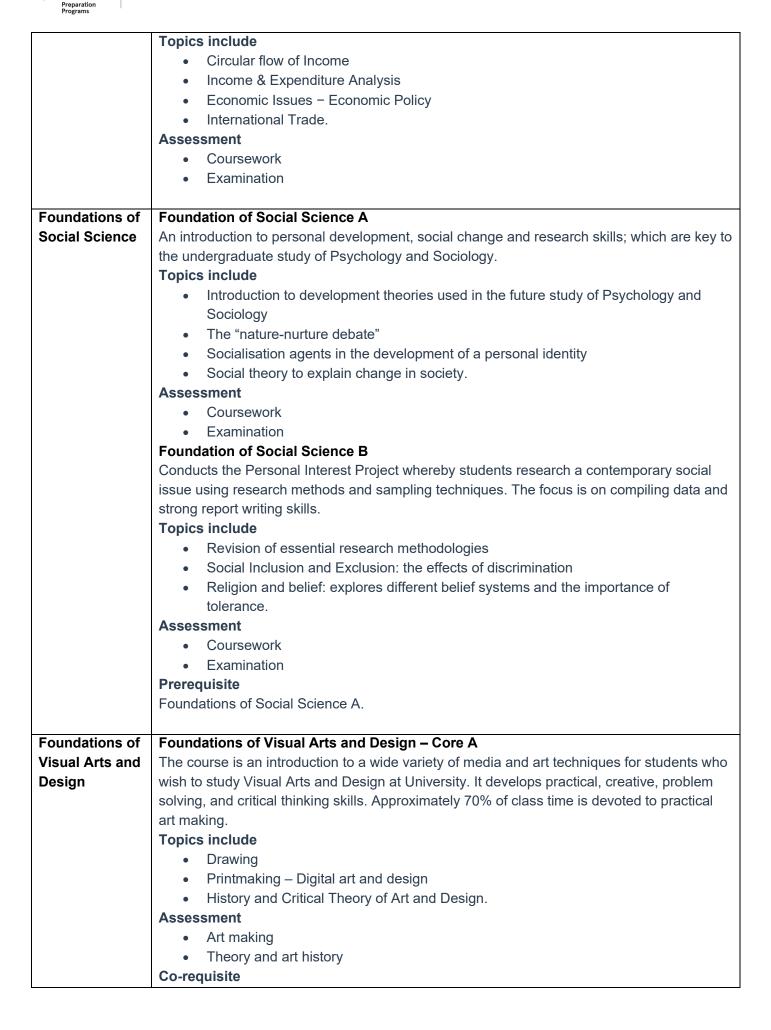

English	English A & B
Linghon	English A and B aims to provide thorough training in the language and related academic
	skills which will enable students to best achieve their academic potential at University.
	The main aims for this module are:
	To develop awareness and competency in the range of language-related skills required for
	successful study at Higher Education level. These include the processes and conventions of
	academic writing, effective and extensive reading strategies, effective participation in
	seminars and delivery of presentations, and listening to and recording information effectively
	from lectures.
	To develop the accuracy and range of written and spoken language to enable students to
	use language effectively and appropriately, with clarity and confidence.
	To support students in reflecting on their learning and identifying how to improve their skills
	and language.
	To ensure students are able to meet the requirements of the partner University through
	demonstrating a minimum English language level of IELTS 6.5 in the skills of reading,
	writing, listening and speaking.
	Topics include:
	Language skills including oral presentations, academic writing, advanced reading
	and comprehension, and active listening
	Advanced academic skills, including critical analysis, independent learning, time
	management, research, analysis of sources and referencing.
	Assessment:
	Semester One English     Coursework
	Examination
	Semester Two English
	Coursework
	Examination
	<b>Prerequisite:</b> Semester 1 English is a prerequisite for Semester 2 English.
Australian	Australian Studies A
Studies	This module explores the diversity of the Australian environment and the impact that people
	have on it. The course will help students to better understand the country they are
	studying in, and to develop an informed perspective on current environmental issues.
	Topics include
	Contemporary issues in the Australian environment
	Weather, climate and hazards of the Australian environment
	Issues and case studies in the Australian environment.
	Assessment
	<ul> <li>Coursework</li> <li>Examination</li> </ul>
	Australian Studies B
	Australian Studies B explores Australian history with a focus on Early Colonial Development
	(1770 – 1840) or Australia in Conflict (1901 – present day). Students will obtain knowledge,
	understanding, attitudes, values, and skills to develop informed perspectives on a range of
	historical issues. Students will undertake investigations through the analysis of historical

	Properties of matter
	Topics include
	inorganic chemistry. Students learn laboratory and analytical skills required for undergraduate study.
	Develops students knowledge and understanding of fundamental concepts in physical and increasing chemistry. Students learn laboratory and applytical skills required for
Chemistry	Chemistry A
	Examination
	Assessment     Coursework
	Plant and animal systems.  Assessment
	Ecology     Plant and animal systems
	Origin of life
	Biochemistry
	Topics include
	practical, research, analysis and presentation skills.
	origin of life will demonstrate the evolution of the unique Australian ecology. Develops
	An introduction to the structures, processes and systems of plants and animals. Study of the
	Biology B
	Examination
	Coursework
	• Mendehalf Genetics.
	<ul> <li>Genetic Engineering</li> <li>Mendelian Genetics.</li> </ul>
	Classification     Evolution
	<ul> <li>Cells</li> <li>Classification</li> </ul>
	Australian Biota     Colls
	Topics include
	analysis and presentation skills.
	of modern biology in the context of the world around us. Develops practical, research,
	An introduction to the fundamental concepts and processes of living organisms, and a study

	Examination
	Coursework
	Assessment
	Asylum seekers.
	Changing rights and freedom
	Changing immigration
	Australia such as:
	Students will also gain an understanding of very important contemporary issues facing
	<ul> <li>Colonial development – Federation – Australia in the 20th century.</li> </ul>
	European exploration
	Early Aboriginal life
	Topics include
	required to look for historical bias and formulate written responses to assess historical evidence. This course improves student literacy skills required for university study.
	required to look for historical bias and formulate written responses to assess historical

	Chemical reactions
	Stoichiometry
	Structure and bonding
	Practical work is embedded within each topic.
	Assessment
	Coursework
	Examination
	Prerequisite
	Year 11 Chemistry or equivalent.
	Co-requisite
	At least Mathematics for Business A, however Mathematics for Science A is recommended.
	Chemistry B
	Builds on what students have learnt in Chemistry A and further develops their knowledge
	and understanding of key concepts in physical, inorganic and organic chemistry. Students
	expand their laboratory and analytical skills acquired in Chemistry A needed for
	undergraduate study.
	Topics include
	Chemical reactions
	Stoichiometry
	Energy and electrochemistry
	Equilibrium
	Acids and Bases
	Organic chemistry
	Practical work is embedded within each topic.
	Assessment
	Coursework
	Examination
	Prerequisite
	Chemistry A and at least Mathematics for Business A.
	Co-requisite
	At least Mathematics for Business B, however Mathematics for Science B is recommended.
Economics	
	Economics A (Micro)
	Economics A (Micro) Gain insight into the operation and regulation of the modern market based economy,

THE UNIVERSITY OF

International	International Studies A (Global Relations)
Studies	An introduction to modern international and global politics. Explore the factors that shape
	politics, learn research and analysis skills, and present orally in student seminars.
	Topics include
	Origins of the sovereign state
	<ul> <li>Evolution of the system of states to 1900: war, trade and imperialism</li> </ul>
	World Wars I and II
	Cold War to Decolonisation
	Post-Cold War and contemporary era.
	Assessment
	Coursework
	Examination
	International Studies B (Global Economics)
	Preparation for the undergraduate study of a wide range of international economics,
	business and politics studies. The focus is on practical problem solving through real case
	studies from the modern world of business.
	Topics included
	Globalisation – Economic Development
	<ul> <li>International Trade – Foreign Exchange – Global Financial Markets.</li> </ul>
	Assessment
	Coursework
	Examination
	• Examination
Mathematics	Mathematics for Business A
mathomatico	This course is intended to give students an understanding of, and competence in, aspects of
	Mathematics that are applicable to the real world. It provides students with the background
	and skills necessary for University study requiring some mathematics. Mathematics for
	Business A may be studied as a minor.
	Topics included
	Basic Arithmetic and Algebra
	Functions and Quadratic Functions
	<ul> <li>Calculus – Trigonometry – Statistics.</li> </ul>
	Assessment
	Coursework
	Examination
	Prerequisite
	Year 11 Mathematics or equivalent. Mathematics for Business B
	This subject extends the mathematical studies of Mathematics for Humanities A with
	particular emphasis on applications to problems in Economics and Finance.
	Topics include
	<ul> <li>Further Trigonometry – Logarithmic and Exponential Functions</li> </ul>
	Sequences and Series     Einancial Mathematics – Applications of Calculus to Economics
	<ul> <li>Financial Mathematics – Applications of Calculus to Economics</li> <li>Statistics – Brabability</li> </ul>
	• Statistics – Probability.
	Assessment
	Coursework
	Examination
	Prerequisite

Mathematics for Humanities A or Mathematics for Science A.

## Mathematics for Science A

This course is intended to give students an understanding of and competence in, aspects of Mathematics that are applicable to the real world. It provides students with the background and skills necessary for university study requiring a significant level of mathematics. Mathematics for Science A may be studied as a minor.

### **Topics include**

- Basic Arithmetic and Algebra
- Functions and Quadratic Functions
- Polynomials Calculus Trigonometry Statistics.

#### Assessment

- Coursework
- Examination

#### Prerequisite

Year 11 Mathematics or equivalent.

# Mathematics for Science B

This course extends the mathematical studies of Mathematics for Science A with particular emphasis on applications to physical problems.

## **Topics include**

- Further Trigonometry Logarithmic and Exponential Functions
- Sequences and Series
- Further Calculus
- Applications of Calculus to the Physical World
- Counting Techniques, Probability and Statistics.

#### Assessment

- Coursework
- Examination

#### Prerequisite

Mathematics for Science A.

#### **Further Mathematics B**

This subject extends topics from the core Mathematics for Science course. The material is treated in considerable depth. Advanced Mathematics B may be studied as a minor, subject to prerequisites below.

#### **Topics included**

- Advanced Trigonometry
- Further Integration
- Advanced Applications of Calculus
- Volumes Further Induction
- Binomial Theorem and Probability.

#### Assessment

- Coursework
- Examination

#### Prerequisite

Advanced Mathematics A or high achievement in Mathematics for Science A or Mathematics for Humanities A. Students must be concurrently studying the Mathematics for Science B course.

THE UNIVERSITY OF SYDNEY

Media studies	Media Studies and Communication A
and	This subject is for students who wish to enter the world of public relations and the mass
Communication	media, journalism, TV, radio, film and digital media. It examines the meaning of language,
	media and communication, and takes a historical view of the media in Australia, compares
	newspapers and magazines and the power of media ownership. Digital media is another
	important part of this course.
	Topics include
	Language and communication, text and context, different types of texts for different
	purposes (genre), history and comparison of newspapers and magazines, media
	ownership and digital media.
	Assessment
	Coursework
	Examination
	Media Studies and Communication B
	Here we focus on the ethical issues facing journalists, then we learn to identify and analyse
	the most common types of stories in newspapers like hard news and soft news, as well as
	learn how to analyse and read images in the media.
	Topics include
	<ul> <li>A case study on ethics and privacy issues. Hard news and soft news stories, visual</li> </ul>
	images in the news media.
	Assessment
	Coursework
	Examination
	Prerequisite
	Media Studies and Communication A.
Music	Music – Core Performance A
	This module aims to prepare students who want to take music for a tertiary subject or
	degree at a university.
	Topics include
	Develop music performance skills
	Attending concerts
	<ul> <li>Performing in concert (solo, duo, ensemble)</li> </ul>
	Widening musical repertoire
	Meeting professional musicians.
	Assessment
	Coursework
	Examination
	Prerequisite
	An equivalent to ABRSM or AMEB Grade 6 practical for instruments.
	An equivalent to ABRSM of AMED Grade o practical for instruments.
	In person or USB stick or via a web link or DVD.
	Note:
	Students have the options to choose either the Con pathway or the Taylors Pathway in this
	module. The students who select Con pathway will need to follow the university calendar
	and start their individual tuitions on a later date (about 2 weeks) than the Taylors pathway.
	An additional fee for individual tuition is payable for this subject.
	Music – Core Theory A

This module aims to prepare students who want to take Music for a tertiary subject or degree at a university. It enables students to increase their aural awareness and musicianship skills. **Topics include** Music history Music harmony Music appreciation Score reading. Assessment Coursework Examination Prerequisite An equivalent to ABRSM or AMEB Grade 5 theory or a further placement theory test Music – Elective A This module aims to develop a fundamental understanding of Music. Students will gain the opportunity to perform in concert (solo, duo and ensemble), attend concerts, meet professional musicians and widen their music repertoire. **Topics include** Solo and Ensemble Performance Music Theory (including Music History & Music Aural) Individual Class (one-on-one lessons are provided to each student for an additional fee). Assessment Coursework • Examination Prerequisite This module assumes students have some knowledge of musical notation. An audition and interview are required. An additional fee for individual tuition is payable for this subject. Music – Core Performance B **Develop music performance skill Topics include** • Attending concerts • Performing in concert (solo, duo, ensemble) Widening musical repertoire Meeting professional musicians. Assessment Coursework . Examination • Prerequisite Music Core Performance A. An additional fee for individual tuition is payable for this subject. Music – Core Theory B **Music History Topics include** Music harmony Music appreciation Score reading. •

- Assessment

	• Examination
	Prerequisite
	Music Core Theory A.
	Music – Elective B
	Solo and ensemble performance
	Topics include
	<ul> <li>Music theory (including music history and music aural)</li> </ul>
	Individual class (one-on-one lessons are provided to each student for an additional
	fee).
	Assessment
	Coursework
	Examination
	Prerequisite
	Pass Music Elective A or special audition and theory test. An additional fee for individual
	tuition is payable for this subject.
	New Curriculum July 2024. From July 2024 the Taylors College Sydney will be implementing
	a new Curriculum for Standard, Intensive and Extended Foundation programs.
	The Curriculum will consist of modules which will enhance student skills across multiple
	disciplines and align with the University of Sydney graduate attributes. As part of the new
	curriculum, all students will study the core units of Academic English and Social Research
	and Inquiry. They will then study 3 further modules from the 11 study modules listed below.
	These include. Mathematics – Business Mathematics – Science Accounting and Financial
	Management Economics and Development Applied Computing Art and Design Biology
	Chemistry Physics Cultural Studies International and Global Studies
	* Music will no longer be offered from July 2024
	**Students commencing in January Standard and January Extended and April Intensive will
	not be impacted by the new Curriculum.
	***Current student choice of undergraduate degrees will not be impacted.
Physics	Physics A
	Mechanics, Electricity
	This module will offer learning experiences that help students develop an understanding of
	physicists' work. Students will be introduced to the knowledge and applications which results
	from the work of physicists.
	Experiments form a major component of the course and are designed to develop practical
	skills and introduce students to new technology.
	Topics include
	Equations of motion
	<ul> <li>Forces and Newton's Laws</li> </ul>
	<ul> <li>Energy, momentum and work</li> </ul>
	<ul> <li>Electrostatics and electrodynamics.</li> </ul>
	Assessment
	Coursework
	Examination
	Prerequisite
	Year 11 Physics or equivalent.
	Co-requisite
	At least Mathematics for Business, but Mathematics for Science is strongly recommended.

	Physics B
	Waves and Light, Astronomy
	Develop practical, research and critical thinking skills. Subjects include Astronomy (the study
	of the Universe) and the real-life applications of waves. Experiments and computer data
	analysis form a major part of this course.
	Topics include
	Waves and Light
	Astrophysics.
	Assessment
	Coursework
	Examination
	Prerequisite
	Year 11 Physics or equivalent.
	Co-requisite
	At least Mathematics for Business, but Mathematics for Science is strongly recommended.
USFP Extended	Extended English
program	Extended English focuses on reading, writing, speaking and listening. Skills are linked to a
Extended	thematic topic.
